

PRACTICAL CHECK SHEET

Candidate: _____

Successful

Evaluator: _____

Unsuccessful

Date: _____

1006-PROCESS-28

Standard:	NFPA 1006 – 2021 edition – 5.2.23
Task:	Direct a litter-lowering or litter-raising operation in a high-angle environment
Performance Outcome:	The litter is attached to the lowering/raising and belay systems, an edge is negotiated during a lower and raise; tag lines are used to manage the litter during the lower and raise; the litter can be held in place when needed; operating methods do not stress the system to the point of failure; rope commands are used to direct the operation; and potential problems are identified, communicated, and managed.
Conditions:	Given rescue personnel, an established lowering/mechanical advantage system, a specified minimum travel distance for the load, a victim packaged in a litter to be moved, and a means for negotiating edges and projections along the travel path
Candidate Directive:	“Using the provided rescue system and high-angle environment, direct the lowering and raising of the litter for the specified distance”.

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1	The litter was attached to the lowering/raising and belay systems		
2	An edge was negotiated during lowering and raising		
3	Tag lines were used to manage the litter during the lowering/raising		
4	The litter could be held in place when needed		
5	Operating methods did not stress the system to the point of failure		
6	Rope commands were used to direct the operation		
7	Potential problems were identified, communicated, and managed
