Date: _____

1072-SKILL-01

Standard:	NFPA 1072 – 2017 edition – 4.2.1, 4.3.1, 4.4.1
Task:	Recognize and identify the hazardous materials/WMD and its associated hazards at a hazmat/WMD incident, isolate the hazard area and deny entry, and initiate required notifications.
Performance Outcome:	The candidate will demonstrate the ability to recognize the presence of a hazardous materials/WMD, identify the hazardous materials/WMD along with its hazards, isolate and secure the hazard area, follow personal safety procedures, avoid or minimize hazards, prevent exposure of additional people, initiate the notification process, and communicate the necessary information.
Conditions:	The candidate will be given a hazardous materials/WMD scenario, a copy of the Department of Transportation’s <i>Emergency Response Guidebook</i> , relevant policies and procedures, and approved communications equipment.
Candidate Directive:	“Demonstrate your ability to recognize the presence of a hazardous material, identify the hazardous material and its associated hazards, isolate the hazard area and deny entry, and initiate required notifications.”

NO.	TASK STEPS	TEST	
		Successful	Unsuccessful
1.	Hazardous materials were recognized.		
2.	The chemical name and/or the chemical ID number for the suspect material was identified.		
3.	The material name in the appropriate section of the ERG was located using the yellow section to obtain information based on the chemical ID number or the blue section to obtain information based on the alphabetical chemical name. <i>Any green highlights were noted.</i>		
4.	The correct emergency action guide was used for the chemical identified.		

5.	The potential fire and explosion and/or health hazards of the chemical were identified.		
6.	The isolation distance and the protective actions required for the chemical were identified.		
7.	The hazard area was isolated and secured.		
8.	Exposure of additional people was prevented.		
9.	The emergency response actions of the chemical were identified.		
10.	The notification process was initiated and the necessary information was provided.		
12.	Personal safety policies and procedures were followed.		
13.	Hazards were avoided or minimized.
