LGCAP 2024

Introduction

Reaching [net-zero emissions](#) and adapting to a changing climate will require a whole-of-society approach. The Local Government Climate Action Program (the Program or LGCAP) aims to catalyze the efficient flow of financial resources, data and knowledge between Modern Treaty Nations, local governments, and the Provincial Government to allow for cost effective, impactful, locally implemented climate action. For more information about the Program you can refer to the [website](#).

What is climate action?

For the purposes of this program, a climate initiative or action is one that reduces greenhouse gas (GHG) emissions (mitigation) and/or strengthens resilience to the impacts of climate change (adaptation). This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

Information collected will:

- Highlight local government and Indigenous climate leadership;
- Profile action by including local government and Modern Treaty Nation emissions, resilience and climate action performance data in the annual [Climate Change Accountability Report](#);
- Help inform policy development and monitor progress on achieving provincial and local climate objectives; and
- Support provincial efforts to better collaborate with and support communities to advance climate action.

The survey was informed by:

- Feedback from local governments, Modern Treaty Nations and ministerial partners;
- National and international GHG reporting protocols; and
- The CDP (formerly [Carbon Disclosure Project](#), a global non-financial disclosure system).

Instructions

**Please do not provide any personal information (e.g. email, phone number) in the survey.*

Survey: Word Version

A survey template (i.e. a Word version) is available on the [Local Government Climate Action Program webpage](#). The template can be used to gather information from staff across departments. Then simply cut and paste into the online version where you'll be submitting the survey.

Survey: Online Version

SimpleSurvey allows multiple users to access your survey, though two people **cannot** enter information at the same time.

- For other users to contribute to your survey, simply share the unique link with your team members.
- Users must select "Save and continue later" when they are done updating the survey but not ready to submit.

Required fields are indicated with a red asterisk (*). You will not be able to submit the survey and attestation form without completing these fields.

- Some fields have formatting considerations (i.e. numbers only). You will not be able to submit the survey and attestation form until all required fields are completed properly. The red text error message will indicate what is needed.

There is a 9,999 character limit for the open-ended questions.

Attestation Form

The attestation form is filled in after survey questions are completed. It is the second page of the SimpleSurvey submission.

- The attestation form is where the Chief Financial Officer, or equivalent position, attests to the following:
 - That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
 - That Local Government Climate Action Program funds for years 1 and 2 received in 2022 and 2023 will be spent by March 31, 2025.
 - That Local Government Climate Action Program funds for years 3-5 received in 2024 will be spent by March 31, 2028.
 - That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2024.

Requirements

1. Reporting

1. Report on **at least one** project linked to objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#). If your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. Funding for the project(s) does **not** need to come from this program.
 2. For communities with populations of 10,000+ (based on 2020 BC Census data figures), measuring and reporting local government's traditional services emissions is required.
 3. Attest that funds will be allocated to climate initiatives before submitting your survey.
- Open-ended questions asking for one or more initiatives related to climate action may be highlighted in Provincial materials to acknowledge innovative local climate solutions. A template to submit climate action success stories for publication can be found on the [Local Government Climate Action Program webpage](#).

2. Deadline to submit the survey & attestation form

- The deadline for submitting your survey and attestation form is 4 PM PDT on July 31, 2024.

3. Posting the survey & attestation form publicly

- The design / format of the form **can** be changed, however, all information from required questions must be included.
- Optional questions and answers can be omitted.
- The deadline to post the survey and attestation form publicly is September 30, 2024.

Download a copy for your records!

Once submitted, you can **download a copy of the completed survey** and attestation form (PDF, Excel, and Word options). If you close this window before the download link appears, please reach out for a copy of your submission.

Support

If the survey is accidentally submitted, a submitted survey needs to be revised, or if you have any questions, please reach out to us at LGCAP@gov.bc.ca. We will be happy to provide assistance.

Thank you!

The LGCAP Team

The Survey

Climate Action Planning

Climate Action Plans are strategic roadmaps that identify how an organization will reduce their greenhouse gas (GHG) emissions (mitigation), increase their resilience to the impacts of climate change (adaptation), or a combination of both.

To answer the following questions, consider staff that contribute to activities that reduce greenhouse gas (GHG) emissions and/or strengthen resilience and the ability to adapt to climate-induced impacts. This includes (but is not limited to): climate-related hazards; integrating climate change measures into policies, strategies and planning; improving education, raising awareness of climate change causes and solutions, increasing human and institutional capacity with respect to climate change mitigation and adaptation, and impact reduction and early warning systems.

Question 1 a): How many staff in full time equivalents (FTEs) are dedicated to working specifically on climate action?

If a staff member is a climate action coordinator and works 100% on climate-related issues, add 1.0.

3.5

Question 1 b): How many staff in full time equivalents (FTEs) are dedicated to working on climate action in other departments such as transportation or engineering?

For example: Can include staff in engineering, emergency management, transportation, waste management, etc. related to climate work but whose primary role is not working on climate action. If a staff member works approximately 25% (please estimate) on climate-related issues, add 0.25. Working on climate-related issues does not need to be written into the staff member's job description to be counted here.

13.5

Question 2 a): Does your local government or Nation have a community-wide climate action plan or other guiding document(s)?

Yes

Please select the type of plan(s) from the list.

In the textbox, indicate the date the plan was adopted/approved in format YYYY-MM. If you don't remember the month, you can enter "01" for January.

Integrated climate plan (addressing mitigation, adaptation and/or energy use)
2022-07

Please include a link to the document or webpage if available.

<https://www.nanaimo.ca/docs/city-plan-documents/city-plan---low-resolution-2022-jul-04.pdf>

Question 2 b): Does your local government or Nation have a corporate climate action plan or other guiding document(s)?

Yes

Please select the type of plan(s) from the list.

In the textbox, indicate the date the plan was adopted/approved in format YYYY-MM. If you don't remember the month, you can enter "01" for January.

Integrated climate plan (addressing mitigation, adaptation and/or energy use)
2022-01

Please include a link to the document or webpage if available.

<https://www.nanaimo.ca/docs/departments/environmental-documents/city-of-nanaimo-semp---nov-24-2020.pdf>

Question 3: Has your local government or Nation declared a climate emergency?

Yes

Question 4: Please select up to 3 challenges impeding the advancement of climate action in your community.

Lack of jurisdiction.
Lack of financial resources.
Lack of data or information.

Optional: Is local political support a challenge your local government faces that is impeding climate action?

No

Traditional Services Greenhouse Gas Emissions

Measuring traditional services emissions (defined in previous years as corporate emissions) is a Program requirement for all communities with a 2020 population of 10,000 and above ([see population statistics here](#)). Traditional services GHG emissions are those produced by the delivery of local government or Modern Treaty Nation “traditional services” including:

- Fire protection,
- Solid waste management,
- Recreational / cultural services,
- Road and traffic operations,
- Water and wastewater management, and
- Local government administration.

Please see the following resources for guidance:

- [LGCAP Traditional Services Boundaries and Scope Guidance](#),
- [Scope Summary Document](#),
- [Traditional Services Inventory Reporting Tool](#),
- [Contracted Services Emissions Guidance](#),
- [Contracted Emissions Calculator](#),
- [BC Best Practices Methodology for Quantifying GHG Emissions](#), and
- [Emission Factors Catalogue](#).

Question 5: For the 2023 calendar year, has your local government or Nation measured and reported associated traditional services GHG emissions?

Yes

If your local government or Nation measured 2023 traditional services GHG emissions, please report the GHG emissions from services delivered directly by your local government (in tonnes of carbon dioxide equivalent) from scope 1 and 2 sources.

4763

If your local government or Nation measured 2023 traditional services GHG emissions, please report the GHG emissions from contracted services (in tonnes of carbon dioxide equivalent) from scope 1 and scope 2 sources.

524

If your local government or Nation measured 2023 traditional services GHG emissions, please report the total GHG emissions from both directly delivered and contracted services (in tonnes of carbon dioxide equivalent) from scope 1 and scope 2 sources.

This would be the sum of the two questions above.

5287

If your local government or Nation measured 2023 traditional services GHG emissions, please report what protocol you used to measure emissions.

The scope, boundaries and GHG Quantification methodologies prescribed for LGCAP were used to calculate the GHG emissions for 2023.

Optional: Please indicate how many tonnes of CO₂e are associated with facilities.

2831

Optional: Please indicate how many tonnes of CO₂e are associated with mobile sources.

1932

Optional: Please provide any further comments you wish to share on traditional services emissions measurement and reporting here (e.g. system or approach used to measure traditional services emissions).

For 2023, the City of Nanaimo can claim 4652 tonnes of reductions from Organic Diversion in partnership with the Regional District of Nanaimo.

Community-Wide Greenhouse Gas Emissions

B.C. [Climate Action Charter](#) signatories have committed to measuring and reporting their community-wide GHG emissions generated from all GHG sources (anthropogenic) within their community boundary.

The [Community Energy and Emissions Inventory](#) (CEEI) initiative provides a provincial framework for tracking and reporting energy and GHG emissions at a community-wide scale. It is published with a two-year lag, however, raw data can be requested by local governments that wish to measure and report their community-wide emissions for the buildings and solid waste sectors ahead of publication.

The Climate Action Secretariat (CAS) is aware that some local governments are developing their own community-wide GHG emissions inventories (separate from the provincial CEEI). A better understanding of community-wide emissions measurement across B.C. will help CAS as we upgrade CEEI.

Question 6: For the 2023 calendar year, have community-wide GHG emissions been measured for your local government or Nation?

Yes

Please report your community-wide transportation sector emissions in tonnes of CO₂e for 2023.

475951

Please report your community-wide buildings sector emissions in tonnes of CO₂e for 2023.

298029

Please report your community-wide solid waste sector emissions in tonnes of CO₂e for 2023.

31793

If your local government or Nation measured your community-wide emissions, please report the protocol(s) you used to measure emissions.

Other.
GPC+

For the 2023 calendar year, did your community use raw data from the Community Energy and Emissions Inventory initiative to calculate community-wide emissions?

Yes

Question 7: Currently, the Province's legislated GHG emission reduction targets are 40% by 2030, 60% by 2040 and 80% by 2050, relative to 2007. Please state your local government or Nation's target(s).
Please enter "0" if no targets or baseline are established for the years given in the table.

2030

Reduction Percentage (format: e.g., 40)

50

Baseline Year (format: e.g., 2007)

2010

2040

Reduction Percentage (format: e.g., 40)

0

Baseline Year (format: e.g., 2007)

0

2050

Reduction Percentage (format: e.g., 40)

100

Baseline Year (format: e.g., 2007)

2010

Question 8: Does your local government or Nation have net-zero or carbon-neutral emissions target(s)?

Please select all that apply.

Yes: Community-wide net-zero target (Net-zero refers to a jurisdiction or organization achieving a balance between greenhouse gas emissions produced and removed from the atmosphere (e.g. planting trees or using carbon capture technologies))

Question 9: Please select up to three supporting indicators that would be most valuable to your local government or Nation to advance climate action (these indicators were previously reported through the Community Energy and Emissions Inventory initiative).

Residential density: Population and dwelling units per "net" land area

Commute by mode: Employed labour force by mode of commute

Proximity to transit: Persons, dwelling units and employment within walking distance of a "quality" transit stop/line

Provincial Policy Alignment - Mitigation

The CleanBC Roadmap to 2030 is B.C.'s plan to meet provincial emissions reduction targets to be 40% below 2007 levels for 2030 and set us on course to reach net-zero emissions by 2050.

One requirement of this Program is that you must **report on a minimum of one project** linked to objectives from the [CleanBC Roadmap to 2030](#) and/or [Climate Preparedness and Adaptation Strategy](#) (CPAS). Funding does **not** need to come from this program. For questions 10-13, if your community reports one initiative related to one sector (e.g. buildings) you have satisfied this requirement. That said, please select all that apply.

Question 10: Please indicate all climate initiatives your local government or Nation had in-progress, ongoing or completed in the 2023 calendar year related to the buildings sector. This should not be limited to what your LGCAP funding supported.

Corporate

Community

Corporate buildings policies, programs and actions.

Zero Carbon Step Code adoption.

Efficiency upgrades/retrofits.

Community-wide buildings policies, programs and actions.

Topping up Provincial energy efficiency incentive programs.

BC Energy Step Code adoption (Step 3 or higher).

Zero Carbon Step Code adoption.

Please enter the step for part 3 buildings (Energy Step Code).

Optional

EL-4 required as of July 1, 2024 - many community owned buildings are exempt (ie: pools). Current at BCBC minimum requirement (Step 2). Step 3 required January 1, 2026

Please enter the step for part 9 buildings (Energy Step Code).

Optional

EL-4 required as of July 1, 2024.

Please enter the step for part 3 buildings (Zero Carbon Step Code).

Optional

EL-1 is required as of October 16 2023, EL-4 required as of July 1, 2024

Please enter the step for part 9 buildings (Zero Carbon Step Code).

Optional

EL-1 required October 16, 2023, EL-4 required as of July 1, 2024

Please highlight a community project(s) that was in-progress, ongoing or completed in the 2023 calendar year related to buildings. Please enter NA if your community reported no buildings initiatives ongoing, completed or in-progress for 2023.

In 2023, the City of Nanaimo became just the third municipality in BC to adopt the top step of the Zero Carbon Step Code. On 2023-OCT-16 Council gave the fourth and final reading to Building Bylaw Amendment Bylaw 2023 No. 7224.05. The bylaw implemented the Provincial Zero Carbon Step Code and advanced the BC Energy Step Code for Part 3 Buildings only. As of 2024-JUL-01, a new building or structure to which Part 3 or Part 9 of the Building Code applies, and which is within the scope of the Zero Carbon Step Code, must be designed and constructed to meet performance requirements specified in EL-4 (Zero Carbon Performance) of the Zero Carbon Step Code. In addition, starting on 2026-JAN-01, all new Part 3 building applications will need to meet Step 3 of the BC Energy Step Code.

Question 11: Please indicate all climate initiatives your local government or Nation had in-progress, ongoing or completed in the 2023 calendar year related to the transportation sector. This should not be limited to what your LGCAP funding supported.

Corporate

Community

Corporate transportation policies, programs and actions.

Electric vehicle charging studies/planning.

Electric vehicle charging infrastructure investments.

Community-wide transportation policies, programs and actions.

Improving or expanding public transportation.

Mode shift targets for passenger and/or commercial transportation (shifting from private vehicles to sustainable modes like walking, cycling and public transit) in Official Community Plan, Regional Growth Strategy or other guiding documents.

Active transportation planning.

Active transportation infrastructure investments.

Active transportation education and encouragement programs.

Expanded micromobility access, bylaws and/or infrastructure (e.g. introduced or expanded bike/e-bike/e-scooter sharing programs, built new bike/scooter lanes, updated bylaws for use of bikes/scooters).

Implement pedestrian plazas, car-free streets (temporary or permanent) or limited-access automobile streets.

Mandatory EV infrastructure in new construction.

Please highlight a community project(s) that was in-progress or completed in the 2023 calendar year related to transportation. Please enter NA if your community reported no transportation initiatives ongoing, completed or in-progress for 2023.

Night Market- Every Thursday during the summer months the City closes Commercial Street (the City's primary downtown street) to host a highly popular Night Market organized by the Greater Nanaimo Chamber of Commerce. Evo Bike Share- In 2023 the City began discussions with BCAA's-Evolve Bike Share to launch a bike sharing pilot program in Nanaimo. The program was launched in 2024 starting with 16 bike parking zones. Nanaimo residents and visitors are able to access shared e-bikes through the Evo app for short term use and return then to any designated parking zone.

Question 12: Please indicate all climate initiatives your local government or Nation had in-progress, ongoing or completed in the 2023 calendar year related to community-wide and corporate action. This should not be limited to what your LGCAP funding supported.

Corporate
Community

Corporate climate policies, programs and actions

Circular economy or zero waste strategy.
Sustainable procurement policy.

Community-wide climate policies, programs and actions.

Complete, compact communities
Organics diversion
Circular economy or zero waste strategy

Complete, Compact Communities - Please select all that apply.

See Complete Communities Guide and Program for supports advancing identified community goals through the creation of more complete, compact and energy efficient communities.

Rezoning
Secondary suites and laneway homes
Infill development

Please highlight a community project(s) that was in-progress, ongoing or completed in the 2023 calendar year related to community-wide or corporate action. Please enter NA if your community reported no community-wide or corporate initiatives ongoing, completed or in-progress for 2023.

In 2023, the City launched a project to increase the diversity of housing options including expanding where infill housing is permitted as well as requirements for family friendly and adaptable housing units. The project scope was expanded in early 2024 to respond to new Provincial Housing legislation (Bills 44 and 47) regulating small-scale multi-unit housing and transit-oriented area development.

Provincial Policy Alignment - Resilience and Adaptation

The goal of climate adaptation is to reduce risk and vulnerability associated with climate change impacts. To manage climate impacts, local governments and Nations are integrating climate adaptation principles into decisions and everyday activities.

One requirement of this Program is that you must report on **at least one or more** project(s) linked to one or more objectives from the [CleanBC Roadmap to 2030](#) and/or the [Climate Preparedness and Adaptation Strategy](#) (CPAS) in Questions 10-13. If your community reports one initiative related to one sector you have satisfied this requirement, but please select all that apply for Questions 10-13.

Question 13: Please indicate all initiatives your local government or Nation had completed, ongoing or in-progress in the 2023 calendar year to adapt to and build resilience to climate impacts. This should not be limited to what your LGCAP funding supported.

Corporate
Community

Corporate resilience and adaptation policies, programs and actions.

Undertaking or completing a risk assessment at the asset or project level.
Undertaking or completing a Hazard Risk Vulnerability Analysis (HRVA) at the asset or project level.
Collaboration with other communities on resilience planning/initiatives.
Monitoring climate risks or impacts (floods, wildfire, etc.).
Creating data systems to support climate action.

Community-wide resilience and adaptation policies, programs and actions.

Undertaking or completing a risk assessment at the community level.
Undertaking or completing a Hazard Risk Vulnerability Analysis (HRVA) at the community level.
Addressing current and future climate risks through plans, adaptation measure implementation, programs, service delivery, asset management and/or other functions.
Collaboration with other communities on resilience planning/initiatives.
Hydroclimatological data collection.
Monitoring climate risks or impacts (floods, wildfire, etc.).
Public engagement on climate risks and actions.
Creation of policy/procedures to affect change (climate considerations into decision-making processes).
Creating data systems to support climate action.
Developing emergency/hazard response plans.
Other.
Extreme weather response

Please highlight one or more climate adaptation project(s) that were completed, ongoing or in-progress in the 2023 calendar year to reduce risk and increase resilience. Please enter NA if your community reported no community-wide or corporate initiatives ongoing, completed or in-progress for 2023.

Please note that highlights for resilience actions may be shared with the Ministry of Emergency Management and Climate Readiness (EMCR) for them to use on ClimateReadyBC as part of their work on sharing info on climate resilience in BC. EMCR may follow up for more details if needed.

Extreme Heat Response- The project heard from residents about solutions for extreme heat response and mapped populations and neighbourhoods disproportionately at risk of extreme heat. The project will help inform the City's Emergency Response and Recovery Plan and identify resources and strategies that may help support community-based responses during extreme heat weather events.

Question 14 a): Has a climate risk and vulnerability or similar assessment been undertaken for your local government or Nation?

Please select all that apply. In the textbox, please provide the link to the public assessment if available.

No

If not, please select one or more options from the list.

No, but we are currently undertaking one and it will be complete in the next two years.

Question 14 b): Are you integrating climate risk into asset management, budgeting and climate action plans?

Yes, in climate action plans

Question 15: What are the most significant climate hazards and impacts faced by your jurisdiction and what is the timeframe of their expected impact on your community?

For each selection, please indicate if the timeframe of their expected impact is short, medium, long or not sure. (short [current/by 2025]; medium [2026-2050]; long [beyond 2050])

Extreme heat and heat stress

short

Extreme cold, snow and ice

short

Wildfire

medium

Wildfire smoke

medium

Overland flooding

long

Wind, rain, and other storm events

short

Ecological impacts (examples of ecological impacts include biodiversity loss and erosion)

long

Human health impacts

short

Power outages

short

Other

We are currently a new hazard assessment which will be completed June 2025.

Question 16: What information do you need to know to be able to plan effectively for the future of your community, with respect to the hazards and impacts identified in Question 15? Please select one or more of what you consider the most valuable types of information for planning.

Local knowledge
Localized climate modelling and projected scenarios
Assessment of potential community impacts
Assessment of community vulnerabilities
Risk assessment of hazards
Mapping of climate change impacts and hazards
Demographic information
Projected development
Adaptation planning information
Technical expertise to implement solutions
Community/stakeholder engagement and support
Information on partnership opportunities
Examples of actions taken by other communities

Question 17: Based on the hazards and impacts you indicated as most significant in Question 15, which groups are most vulnerable to the impacts of those climate hazards and impacts?

Low-income households
Indigenous Peoples
Seniors
Persons with disabilities
People living alone/isolated

Question 18: Of the hazards and impacts identified in Question 15, please specify the associated adaptation measures completed or in-progress in the 2023 calendar year, if any. If entering a hazard under "Other", please also write the hazard in the "Adaption measure" textbox.

Extreme heat and heat stress

Adaptation measure

Project to identify risk locations & people, create partnership with public health to alleviate risk

Extreme cold, snow and ice

Adaptation measure

Extreme Weather Response - Warming Centres

Water shortages

Adaptation measure

Irrigation adjustments based on weather station data. Early water retention at City reservoir.

Wildfire

Adaptation measure

Firesmart education programs, hazard map being updated with hazard assessment,

Overland flooding

Adaptation measure

new infrastructure sized to accommodate climate change, Public education re catch basins

Wind, rain, and other storm events

Adaptation measure

Included in climate hazard assessment underway. Monitor & include in emergency response training.

Ecological impacts

Adaptation measure

the city sponsors invasive species removal work parties and education programs

Human health impacts

Adaptation measure

Reactivate the response and operational work around procedures from the pandemic.

Power outages

Adaptation measure

Critical infrastructure for the City has a backup power supply.

Equity.

Taking an equity-informed approach to climate action is about enhancing climate resilience for everyone in B.C., regardless of where and how they live and requires a just approach that integrates equity considerations into climate planning and adaptation responses.

Question 19: How does your local government or Nation ensure equitable access to and distribution of climate action opportunities and benefits?

Please select all that apply.

By collecting and analyzing disaggregated and/or spatial data on the impacts of climate policy and change.

By engaging with equity seeking groups/frontline communities most impacted by climate policy and change.

By designing and implementing climate actions that remove barriers to participation in planning and programs faced by equity seeking groups/frontline communities most impacted by climate change.

LGCAP Year 2 Funding

The Program must be able to demonstrate the impact this funding has on greenhouse gas emissions reductions and resilience and adaptation in B.C. To substantiate the Program, we must develop a baseline understanding of where local governments and Nations are at with respect to climate action and track progress over time.

Please do your best to specify how much of your LGCAP funds was invested for each initiative undertaken without double counting.

Question 20: What did/will your local government or Nation spend its LGCAP funding on for year two of the Program (2023)? Please select all that apply and indicate the total dollar value associated with each initiative. For LGCAP 2023 funding, City of Nanaimo received 325082. Please ensure the amount(s) entered for Question 20 equal this amount in total.

Corporate
Community
Funds on hold
282

Corporate Initiatives

Textbox format: no dollar sign and up to two decimal points (i.e. 2500 or 657.25). If selecting "Other", please write both the item and the amount of funding in the textbox.

Buildings initiatives

Corporate buildings policies, programs and actions.

Textbox format: no dollar sign and up to two decimal points (i.e. 2500 or 657.25). If selecting "Other", please write both the item and the amount of funding in the textbox.

Efficiency upgrades/retrofits.
288300

Community Initiatives

Textbox format: no dollar sign and up to two decimal points (i.e. 2500 or 657.25). If selecting "Other", please write both the item and the amount of funding in the textbox.

Climate engagement
20000

Buildings initiatives

Community-wide buildings policies, programs and actions.

Textbox format: no dollar sign and up to two decimal points (i.e. 2500 or 657.25). If selecting "Other", please write both the item and the amount of funding in the textbox.

Other.
Home Retrofit Support Program. 16500

Funds on hold - How will funds be allocated?

Please indicate the project(s) funds have been allocated to.
Projects in 2024

Please highlight the initiative(s) your local government or Nation's LGCAP year two funding will support.

Initiatives for 2023 funding include: Lighting upgrades at 3 City facilities (Cliff McNabb Arena, Beban Complex Parking lot, Oliver Wood Community Centre). Funds were also used for community initiatives such as a Home Retrofit Support Program and a Community Environmental Project Grant Program.

Question 21 a): How much additional funding for climate action were you able to invest by leveraging your LGCAP funds? This could include matching grants as well as private investment.

Format: no dollar sign and up to two decimal places

0

Question 21 b): Please list the funding programs leveraged and associated funders (i.e. Investing in Canada Infrastructure Program, Canada/Province).

Please enter "NA" if no funds were leveraged.

N/A

Question 22: What is your internal decision criteria for spending LGCAP dollars?

The City is continually looking for solutions that reduce GHGs in the community and corporately. The Facility Asset Management group looks to replace infrastructure with products that reduce the City's carbon footprint, and the Sustainability Department looks to support studies and programming for the community to support GHG reduction. These initiatives are reviewed during the financial plan process to determine what is the best use of these funds (GHG reduction, alternative funding sources etc.).

Question 23: Does your local government or Nation use a formal framework to apply a climate lens on infrastructure planning and decision-making?

This could include the Provincial preliminary GHG assessment guidance, the Federal climate lens guidance, or another climate lens framework.

Yes

Question 24: What is the value in the Program's continuity for your community?

Optional

LGCAP reporting and funding continue to be essential to helping our community reach our climate targets. Funding enables the City to use funds towards infrastructure upgrades to reduce our carbon footprint establishing a leadership role in our community towards sustainability. Funding also enables us to support community emission reduction projects including grants/rebates, studies, education programming, and implementing regulations aimed to reduce emissions.

Please note on posting the survey publicly:

- All information from required questions must be included.

- Optional questions and responses can be omitted.
 - The Province will use the information for internal purposes only.
- When posting the survey publicly, the design / format of the form can be changed.

Local Government Climate Action Program Attestation Form

Instructions for the Attestor (CFO or equivalent staff person):
Complete and sign this form by filling in the fields below.

I, the Chief Financial Officer, or equivalent position, attest to the following:

1. That Local Government Climate Action Program funding has been, or will be, allocated to climate action.
2. That Local Government Climate Action Program funds for years 1 and 2 received in 2022 and 2023 will be spent by March 31, 2025.
3. That Local Government Climate Action Program funds for years 3-5 received in 2024 will be spent by March 31, 2028.
4. That a completed and signed version of this form and survey contents will be publicly posted by September 30, 2024.

Attested by (first name, last name)

Laura Mercer
